

Internet and Social Media Permission

Images of children actively involved in daily activities can provide a valuable insight of a day at Nursery, as well as individual developments of a child. They can also help the nursery to communicate these developments and the benefits of a Montessori education.

Therefore we may occasionally take photographs of children while involved in nursery activities or events. Images or video may also be displayed or used within the nursery premises.

As noted in the Nursery Terms and Conditions and our Data Protection Policy photographs and video are necessary for the nursery's administrative, functional and educational purposes.

Images will be carefully and sensitively chosen and will not be used out of context.

- Images will also become part of the Nurseries archive, providing a visual insight for future generations.
- Pupils will not be identified by name or photos in the photographs.
- If we want to use your child's full image in any situation we will contact you again to request specific consent to do so.

I understand that this consent will remain in place until the parents withdraws such. I also understand that consent may be withdrawn at any time.
